

Bright ideas. Brilliant results.

ELC Technologies is the leading edge developer of next generation Internet technologies. We enable businesses worldwide to take full advantage of their opportunities in web and mobile applications, and cloud computing solutions. Our clients draw from more than a decade of sophisticated application development experience and rely on us as a guide and partner when planning and executing strategic application deployment.

We know where mobile extends your opportunities, where the web strengthens your business, where the cloud opens up a new world for growth and how these solutions provide you with tremendous value. Breaking the barriers to new Internet technologies is our passion. Knowing what matters is our experience. Creating strong and effective applications that will help you grow is what we do.

**400+**  
Years of app development experience

Secure transactions per month

**80,000,000+**  
People using ELC apps worldwide

### ELC Mobile

Mobile computing has gone mainstream and is outgrowing any other segment of the IT industry. With ELC, you can climb to the next level and overcome hurdles and challenges to accelerate your business growth.

### ELC Cloud

We deliver value because we understand the technology needs of businesses. We are your partner to answer your questions and provide advice to help you take the right steps at the right time, especially in emerging fields such as cloud computing.

### ELC Apps

ELC has the experience to provide guidance and execution, resulting in an immediate return on your investment. We have led the development of complex web applications for successful start ups as well as established brands.

### Core Solutions

Over time, we have developed core functionality for a range of applications including social networks, e-commerce, SaaS, CMS, ERP and many others. Our use of dynamic programming languages and ownership of extensive software libraries offer highly scalable, stable products across many vertical market sectors with exceedingly short times to market.

### Clients

We are proud of our customer list which includes Fortune 500 companies, major professional sports leagues, and global media conglomerates. We have successfully engineered sophisticated Ruby on Rails solutions, innovative interactive tools, trend setting mobile technologies and business critical applications. Contact us to learn more about the applications we have developed.
